

Mechanical Service Engineer

Print & Pack

Australia | New Zealand

- Career opportunity
- Major Supplier Print and Finishing Equipment
- Excellent salary package
- Sydney Based

We are a long standing highly respected and well renowned supplier of Print and Finishing Capital Equipment. We currently have a vacancy for an energetic and customer, focussed Senior Mechanical Service Engineer for Offset Printing Machines.

Working alone or as part of a professional team your responsibilities will involve primarily, but not be restricted to, the Installation, service and maintenance of new and existing capital equipment with the prime focus on offset printing equipment (primarily on machines from Komori, Japan). This will include liaising with service coordinators and third party suppliers as required.

Whilst this is a Sydney based position travel both Interstate and International will be involved periodically.

Mechanical trade qualifications are required and whilst previous Printing industry experience would be preferred it is not essential. Electrical knowledge/experience will also be considered favourably.

As the successful applicant you will be PC literate, proactive with good time management and can communicate comfortably. You understand and possess the ability to prioritise and work unsupervised to meet strict deadlines as required.

This is an excellent opportunity to take that next step in your career.

In-depth training both locally and overseas will be provided along with an attractive salary package including vehicle and additional allowances plus Superannuation.

Please reply with CV to pallavi.dharni@printandpack.com.au

All correspondence treated in the strictest confidence.
